

Plan Plotting & Printing

With the arrival of our cutting-edge Océ Plotwave 300 printer, we now offer in addition to our regular plan copying service, a new plotting and printing service for designers and engineers.

Plans can be printed in black and white up to A0 size direct from your files at 600dpi onto 80gsm paper, to produce a clear and sharp image, with super quality grey tones for tinted areas.

Colour plotting/printing up to A0 is also offered on our dedicated HP plotters, giving economical non-fade line drawings. Full colour large format poster printing is also available.

Various file formats can be accepted: PDF, DWF, PLT, TIF, etc. These can be emailed or brought in on CD or stick. We are happy to print initial test samples to show you the quality.

- Sizes: up to A0 & 914mm wide by any length
- Folding service can be offered at 10% extra
- Enlargement/reduction from 10% to 1000%
- Discounts available to account customers

- Sizes: up to A0 & 914mm wide by any length
- Media: various file formats, PDF preferred
- Folding service can be offered at 10% extra
- Enlargement/reduction from 10% to 1000%
- Discounts available to account customers

Plan Copying

Our well-known plan copying services continue but with improved quality, speed and the new functions of enlargement and reduction, which have not been possible to date, but have often been asked for.

We can copy from your tracing or white paper originals, and the new Océ handles less-than-perfect originals far better than in the past!

We can copy plans, from A2 to A0, onto 80gsm paper and these are supplied rolled, or folded for you at a small surcharge.

Colour copying from A2 to A0 is also possible via our wide format scanning service and HP and Roland colour plotters.

Plan Scanning/Archiving

We can now scan your old drawings for easy electronic storage and retrieval, scanning from tracing, plain or dyeline paper at 600dpi. At this resolution, 500 A1 scans will fit onto a single CD.

An enhancement service is available to despeckle and skew drawing files and the background tint to old blueprints can be removed as far as is practicable.

Get rid of those bulky old plan chests and catalogue your computer archives for ease of recalling and reviewing your drawings.

Various format files can be supplied; TIF, JPG, PDF etc., and can be emailed, burnt to CD, DVD or onto your memory stick. Files are automatically sequentially named but can be custom-named if required.

- Sizes: up to A0, 914mm wide by any length
- Various file formats, PDF recommended
- Single files or multi-page files offered
- Scans can be arranged into job folders
- Discounts available for quantity scanning

- Architectural background and knowledge
- Conversion service from DWG/DWF to PDF
- Enlargement/reduction from 10% to 1000%
- Digital cleaning and restoration service

Special Plan Services

Our new CAD facilities allow us to offer a unique range of special services for Architects, Designers, Planners and Engineers. With our architectural background, we also offer an insight into your business, printing and presentation requirements.

We can advise on file conversions from physical plans or from various CAD file formats to PDF. We can reduce or enlarge whether not-to-scale or to a new scale factor. We offer test plots to show the quality both in black & white and colour.

Drawings can be digitally cleaned if they are old, dirty or torn. They can be edited to add or remove text or sections, and areas can be highlighted, bringing them back to life.
